

SSRF Digital Transformation Portfolio 2026

Building the Digital Operating System of Seven Spikes Relief Foundation

BOARD-LEVEL EXECUTIVE PRESENTATION

2026

Executive Summary

Four Platforms. One Ecosystem. Complete Transformation.

SSRF designed, built, and deployed four proprietary platforms — eliminating manual processes, external dependencies, and data fragmentation across the organization.

4

Production Systems

Live and operational

2,100+

Managed Donors

Full data ownership

100%

Data Sovereignty

Zero vendor lock-in

24/7

Operational Visibility

Real-time reporting

The Challenge

Why Digital Transformation Was **Non-Negotiable**

Workforce Visibility

No real-time tracking of field staff or remote teams

Program Management

Orphan and program data fragmented across spreadsheets

Donor Data Ownership

Critical donor records held by third-party platforms

Inventory Control

Shipments and stock tracked manually with no audit trail

Before & After: A Structural Shift

Before:
Fragmented
and High-Risk

After:
Streamlined
and Scalable

What Changed

SSRF replaced disconnected manual workflows with an integrated digital architecture — purpose-built for scale, transparency, and operational control.

Manual → Automated

Siloed → Unified

External → Owned

The SSRF Digital Ecosystem

Four proprietary platforms operate as a unified ecosystem — all connected through the SSRF Digital Core, with a Unified CRM Platform planned for 2027 integration.

Platform Deep Dive

RWT & OMS: People & Programs

Remote Work Tracker

Real-time field workforce monitoring with automated payroll validation and compliance reporting.

- Full workforce transparency
- Payroll accuracy & accountability
- Live analytics dashboard

LAUNCHED APRIL 2026

Orphan Management System

End-to-end sponsorship lifecycle management with automated Gift Aid processing and audit-ready records.

- Gift Aid revenue optimization
- Program compliance & audit readiness
- Sponsorship continuity assurance

Platform Deep Dive

SSR Store & Donor System: **Inventory & Relationships**

LAUNCHED MAY 2026

SSR Store

Shipment and inventory management with full financial traceability and real-time stock control.

- Inventory accuracy & financial control
- Operational efficiency at scale
- Audit-ready documentation

Donor System

Proprietary donor platform with AI-powered data extraction and direct donation automation.

- **2,100+ donors** under direct management
- 100% data sovereignty — zero third-party dependency
- Significant cost reduction vs. external CRM

Organizational Impact

Four Pillars of Lasting Value

Operational Excellence

Automated workflows eliminate manual effort and reduce error rates across all functions.

Governance & Transparency

Real-time reporting and audit-ready records strengthen donor and board confidence.

Full Data Ownership

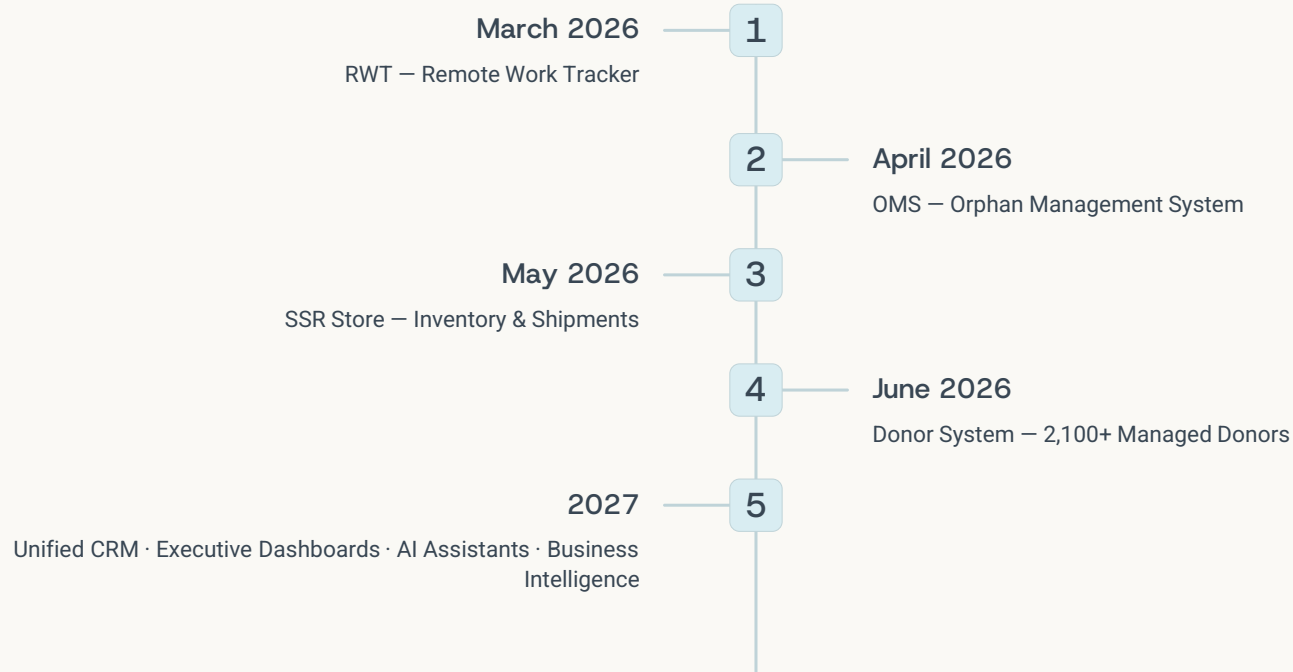

SSRF owns, controls, and secures all operational and donor data — no external dependencies.

Scalability

Architecture designed to grow — supporting expanded programs, geographies, and donor volumes.

2026 Launch Sequence & 2027 Vision

All four platforms designed, developed, deployed, and operated internally — zero vendor lock-in, full data ownership, sustainable infrastructure.

The Foundation Is Built.

The objective was not merely to build four systems — but to establish the digital operating foundation that will support SSRF's operations, transparency, and growth for years to come.

Better Decisions	Lower Risk	Higher Efficiency
Stronger Accountability	Long-Term Sustainability
